The Oxford Corpus of Academic English

The Oxford Corpus of Academic English (OCAE) is a database of 85 million words of running English text, taken from undergraduate textbooks, scholarly monographs and handbooks, and academic journals. It was created specially in order to research and compile the *Oxford Learner's Dictionary of Academic English*. The selection of words to include in the dictionary and the content of each entry were based on analysis of this corpus. The following is a list of the books and journals included in the corpus.
